

According to NOAA's data, the "global warming" has stopped

by Bernard Beauzamy

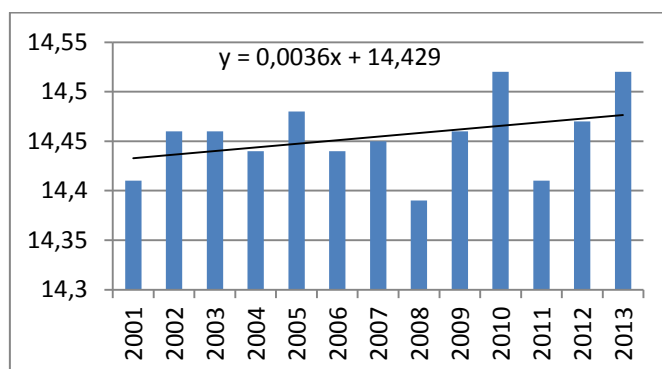

April 2014

According to the official data provided by the US National Oceanic and Atmospheric Administration, the "global warming" has stopped since 2001. Here are the world average data:

année	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013
temp °C	14,41	14,46	14,46	14,44	14,48	14,44	14,45	14,39	14,46	14,52	14,41	14,47	14,52

average world temperatures since 2001 (NOAA)

Here is a representation as a graph:

The tendency line (regression line) has a slope of 0.0036°C per year, which means a 3.6°C increase in 1,000 years.
